

EPIC SF24 RACING

jacobandco.com

The Epic SF 24 is a technological breakthrough in travel time display. A splendid fusion of nostalgia and innovation, the Epic SF 24 travels the world on its owner's wrist. Never used before in a wristwatch, the SF in the name stands for "Split Flap" – named for the mechanical information boards seen in airports and train stations the world over. Powered by the self-winding JCAA02 caliber movement, this timepiece presents 24 time zones and displays two time zones simultaneously.
