

EPIC X RACING

jacobandco.com

Epic X watches are a modern evolution of one of the most traditional forms of watchmaking. The open-worked, or “skeletonized” timepiece allows the movement to be visible both through the dial and the back of the watch, with as much metal removed as possible without compromising functionality.

The goal of the watchmaker crafting an open-worked watch is to achieve the highest level of transparency possible; the combination of visual lightness with structural integrity.

Technical Specifications

Item Number: EX100.21.WR.WB.A

MOVEMENT: Exclusive Manually Wound Jacob & Co. JCAM02 Skeleton Calibre; Barrel and Balance Wheel Vertically Aligned; Diameter: 6¼” i.e. 14.25mm; Height: 5.90mm; Components: 158; Power Reserve: 48-Hours; Frequency: 28’800 vib/h (4 Hz); Jewels: 21 Jewels; System: Barrel with Sliding Clamp System; Balance Screws Visible on the Front Side; Time Setting Spring with Three Functions (“octopus spring”): Ratchet, Lever and Setting Lever; Anti-shock; Finishing: “Jacob & Co.” Upper Bridge; Sand Blasted, Angled and Drawn-finished Bridges; Anthracite and Red Lacquered “Epic X” Engraving on the Right-side bridge; Mirror-polished Finishing Screws; Circular Grained Bridges on the Back.
